

STOCK RANGES OF SINGLE PHASE EMC FILTERS FROM 5A TO 65A

Comprehensive ranges of single phase EMC filters for immediate despatch on a next day delivery.

Single phase filters from 6A to 65A, in both single and two stage configurations 50/60Hz.

Designed for wide range of industrial power applications.

Comprehensive ranges of single phase RFI filters are available to assist design engineers to meet the various requirements of the relevant EMC legislation.

These single phase units are from 5 Amps to 65 Amps and are available in a variety of case, type and termination options. Standard voltage options are up to 250V AC .

The FIN ranges are from FIN 33 to FIN 50, in ascending attenuation levels.

Frequency is 50/60Hz with operational temperature range of -25 deg C to +85 deg C.

The EMK range are specially designed for industrial frequency inverters, drive systems and industrial power applications. For full technical specifications go to www.emikon.com.
